

Lyric Pet

A desktop device that displays the lyrics of your currently playing music in real time!

Lyric Pet uses your PC as a host to detect the current Spotify song, fetch synchronized lyrics and send them to the device over USB.

The lyrics are displayed live on a 0.96" OLED screen as the song plays.

The device is powered by a XIAO RP2040, a 0.96 OLED, and a TTP223 capacitive touch sensor. Tapping on the top of the device plays/pauses your music, and you can also switch between different display modes, including a clock.

The built in RGB LED reacts to the lyrics by changing the color when ever a new lyric line appears.

"I miss that kind of misery The kind where you are nice to me"
